 - 5.1.2 It is responsible for all costs and expenses relating to reprogramming of any PBX or other routing / firewall device that is necessary for access to the Services that is not provided by Voip Unlimited.
- 5.2 For the avoidance of doubt, the Reseller acknowledges that it has sole responsibility for all charges relating to the use of the Services regardless of whether such use is authorised, unauthorised, fraudulent, or otherwise.
- 5.3 Resellers have a choice on how they would like their SIP Channels and numbers to be set up. The standard format is to identify the main number and "alias" any DDIs to it. This means that only a single trunk registration is required on the phone system, with inbound calls to all numbers being routed down this single registered account. This configuration is an efficient way of managing the inbound calls to your phone system.
- 5.4 In the event of a Reseller system/circuit failure Resellers will be able to apply a call divert to the trunk via the Voip Unlimited portal, instantly rerouting all inbound calls to a backup telephone line or mobile of choice.
- 5.5 If Resellers wish to reroute inbound calls from specific DDIs then each number must be set up as a separate Headline number.
- 5.6 All DDIs will be set up as aliased to the first number in the range unless specified otherwise.
- 5.7 Non-Geographic Numbers can only be aliased to a geographic number.
- 5.8 New VoIP DDIs can be aliased to a "Spoofed" number.
- 5.9 In order to minimise the risk of any losses in the event that Voip Unlimited is unable to provide the Services due to a technical problem in relation to the telecommunications network by which the Services are provided, the Reseller must be aware of and follow the procedure for diverting calls-over an alternative network as will be notified to the Reseller in writing from time to time.

 - 5.10.1 A maximum of 20 x SMS messages per month will be sent.
 - 5.10.2 Only one message per hour will be sent.
 - 5.10.3 Only one mobile number can be configured per Headline number.
 - 5.10.4 Only one message will be sent per non-registration alert.
 - 5.10.5 Users can update the mobile number in the portal once the service has been activated.

- 5.10.6 No charge will be incurred when changing the destination mobile number.
- 5.10.7 Users will not be billed separately for the individual SMS messages.
- 5.10.8 The service will be applied on the first Headline number by default, should multiple Headline numbers be required
- 5.10.9 Resellers will be required to add the mobile number via the Voip Unlimited portal once the service has been activated.
- 5.11 In relation to geographic number porting the following conditions are relevant:
 - 5.11.1 If you are porting a geographic DDI range, you have the option of retaining/porting/ceasing the main billing number or retaining/porting/ceasing associated numbers.

 - 5.11.3 Resellers may experience some downtime on the telephony service if "multiline" porting in from ISDN2 or ISDN30 services. This temporary loss of service is due to the manual UK porting process within BT Openreach and is beyond Voip Unlimited's control
- 5.12 In relation to non-geographic number (NGN) porting the following conditions are relevant:
 - 5.12.1 Use the NGN porting letter for non-geographic numbers (e.g. 0845, 0800 etc). The NGN Porting Letter is for the Reseller to authorise transfer of non-geographic numbers to Voip Unlimited's network.
 - 5.12.2 If already "service established" NGN numbers have a porting lead time of 15 working days. The 15 working days will commence from the following day after the order has been submitted up to 16:00 hours and this will be classed as day 0, please allow for this in your calculation.
 - 5.12.3 Although every attempt will be made to meet the stated RRD (Reseller Required by Date) the eventual port date provided to us by the designated Range Holder may differ. Please also note Voip Unlimited cannot be held responsible for not meeting this date due to unforeseen problems or third-party delays of which you will be advised during the course of your porting order.
 - 5.12.4 Only numbers that are specified on the form with "porting" selected will be ported.
 - 5.12.5 Once the numbers have ported please check the inbound call logs on the Voip Unlimited portal to ensure inbound call delivery is being provided.
 - 5.12.6 Please check that your losing Service Provider has stopped billing you for your service once the numbers have ported.

 - 5.13.5 All bundles will reset at the end of each month and any minutes not used in the previous month will not be rolled over.
 - 5.13.6 Bundles must be applied to a single end customer on each occasion. For the avoidance of doubt Bundles cannot be pooled across multiple end Customers.

6.0 Obligations

- 6.1 The Reseller shall:
 - 6.1.1 ensure that all address details are up to date for each DDI as this is the information used by the Emergency services. The address details can be updated from the portal.

- 8.3 Exporting International numbers to another provider may result in an administration charge, charges and impacted countries are available on request.
- 8.4 Since reconfiguring Channels and DDIs *after* provision involves additional systems administration work, we do apply a one-off reconfiguration charge defined in the relevant Price List.
- 8.5 Additional DDIs or channels can be ordered by an email to Voip Unlimited, this email order must come from the authorised email address on the Reseller account and by emailing Voip Unlimited for additional services, the Reseller is accepting charges as per the relevant Price List.

3.0 Service Provision.

- 3.1 Voip Unlimited will notify the Reseller of the ECCs as soon as reasonably practicable after the date of the Service Order Form.
- 3.2 Any works carried out outside of business hours will incur an additional charge.
- 3.3 On receipt of the notice referred to at clause 3.1, the Reseller may, within thirty days, notify Voip Unlimited that the ECCs are accepted, and it wishes to proceed with the Order insofar as it relates to the provision of Ethernet Services.
- 3.4 If the Reseller does not serve any notice under clause 3.3 within thirty days, unless the ECCs are waived as set out at clause 3.5 hereof, the Order insofar as it relates to the provision of Ethernet Services, shall be cancelled by Voip Unlimited. Such cancellation will not affect any agreement between the parties to provide any other Services save where provision of those Services is dependent on the provision of Ethernet Services in which case they shall also be cancelled.
- 3.5 Voip Unlimited may elect at any time, which includes for the avoidance of doubt before or after the Reseller has served a notice pursuant to clause 3.3 hereof and / or before or after the expiry of the thirty-day period referred to above, in its absolute discretion, not to charge the ECCs to the Reseller in which case the Order shall proceed and shall not be cancelled.
- 3.6 Pricing and lead times are subject to site survey and may vary if there is insufficient bandwidth capacity at the premises or if additional work is necessary including but not limited to provision of new fibre, duct work, or building entry points. Any ECCs will be advised after completion of the site survey.

 - 3.8.1 There are two 13-amp power sockets that are available within 1 metre of the termination location.
 - 3.8.2 There is enough space for the equipment required for the service to be installed.
- 3.9 It should be noted that whilst Voip Unlimited makes every effort to ensure that the Survey Engineer is supplied with all the details required to complete the order; the Reseller representative should confirm the required location of the lines with the engineer upon arrival; failure to do this may result in the lines being installed in the wrong location which could result in further charges should the Reseller require these to be moved and further delays to the completion of the delivery.
- 3.10 Should a Wayleave agreement be required the provisioning of the Ethernet service will be placed on hold until such time as the required Wayleave has been entered into.
- 3.11 Any quoted lead times are subject to external factors and cannot be guaranteed by the Company.

- 3.14 Any VU Guard Service added to any Ethernet Circuit must be added for the full duration of the initial term, should the service not be ordered when the circuit is ordered then the subscription pricing will not be available to the customer.
- 3.15 If an Ethernet service that has a VU Guard service attached to it is upgraded, the VU Guard service will automatically be upgraded to match the upgraded Bandwidth and the customer understands by upgrading the Ethernet line they are accepting the upgraded VU Guard charges.
- 3.16 When the customer suspects that a DDoS attack is affecting one of their IPs, they must contact VoIP Unlimited by raising a support ticket or calling the technical support team and Voip Unlimited will then clean the unwanted traffic to remove the attack. Alternatively, if the customer has an active subscription, they can turn the service on from their customer portal area.
- 3.17 Once VoIP Unlimited begin cleaning traffic on an affected IP, the cleaning will take place for a period of 12 hours, after 12 hours has passed the cleaning will automatically be turned off; should an attack resume, the customer will be required to report this to VoIP Unlimited once more to begin the cleaning process again.
- 3.18 Customers can add a "One Off" VU Guard service at any time, but this will be charged at the fees listed in the price list under "One Off" and this does not form part of the subscription.

4.0 Service Commencement Date

- 4.1 Initial term shall commence on the 'service commencement date' and that shall be on the day the service is ready for use.
- 4.2 The Reseller acknowledges and accepts that lead times for Ethernet Services are dependent on third parties and lead times can often take a number of months or possibly years.
- 4.3 Without prejudice to the contents of clause 4.2 Voip Unlimited estimates the following lead times for the Ethernet Services:
 - 4.3.1 30 Business Days if fibre / equipment is present;

6.0 Service Use

- 6.1 The managed termination router must be connected to the service by the Reseller within 48 hours of receipt and any early life failures reported as soon as practicable by the Reseller. If the Reseller fails to

connect the managed termination router and/or report any faults within 48 hours of delivery of the managed router, the Ethernet service will be deemed to be working in accordance with the terms of the Order.

- 6.2 Any supplementary services, such as any backup/failover circuits will be installed and tested by Voip Unlimited after the primary circuit has been handed over to the Reseller.
- 6.3 It is the Reseller's responsibility to ensure that any secondary backup/failover circuit ordered has the required bandwidth and capacity to act as a secondary to the primary circuit.
- 6.4 Any equipment, not including Goods sold to the Reseller, provided by Voip Unlimited for the use of the service shall remain the property of Voip Unlimited and upon cancellation of the service must be returned to Voip Unlimited.
- 6.5 Throughput speed is governed by the relevant Carrier's service level and download prioritisation rates (which may be impacted by network congestion and any potential outages). These throughput rates are delivered on a 'best efforts' basis, unless customers have purchased 'elevated' or 'premium' service variants.
- 6.6 Should equipment need to be returned due to an amendment to the service, the equipment provided for the old service must be returned within 1 week of the amended handover as advised by Voip Unlimited. If the equipment is not received in the time advised, then Voip Unlimited reserve the right to charge the Reseller the current RRP for the equipment.
- 6.7 If the equipment is not packaged sufficiently for transit and the equipment is subsequently damaged in transit, the RRP of the equipment will be charged to the Reseller's account and payable immediately by the Reseller.
- 6.8 The Reseller will cover the costs to return the equipment to Voip-Unlimited.

Once the item has been returned to Voip Unlimited in a good condition, then the funds shall be returned to the Reseller.
- 7.3 The equipment must be received by Voip Unlimited within 5 days of the Termination date, as advised by Voip Unlimited.
- 7.4 It is the Resellers responsibility to ensure that the items are packed sufficiently for shipping. Should the items arrive damaged and Voip Unlimited deems the packaging not sufficient for shipping, the Reseller will be charged the RRP for said equipment.
- 7.5 The Reseller will cover the costs to return the equipment to Voip-Unlimited.
- 7.6 Terminations requested after Order Acknowledgement but prior to Delivery will be subject to a cancellation charge, plus the cost of any additional works that have been carried out to deliver the service up to that point (e.g. ECCs as notified in accordance with clause 3). Please see the latest price list for the relevant charges.

8.0 Service Level Agreement

8.1 Fault Reporting

Customers must report any faults in accordance with 'Section 2 – Reporting a fault' in the Ethernet completion document (Voip Unlimited's service handover document). Upon successful submission of a fault ticket Voip Unlimited will assign a specific priority which is done so at the Company's discretion and can be subject to change based on new information received.

Severity Level	Fault Description
Priority 1 (Total Outage)	For incidents where the issue has existed for five minutes or more before incident logging and is limited to the following: - Total loss of an Ethernet Service (which is defined as no transmission of signals in one or both directions); or Available throughput <10% or predicted Service Bandwidth; or Latency is >100ms; or } across Voip Unlimited's Packet loss is greater than 5% } network only
Priority 2 (Severe Intermittence)	Intermittent connectivity of a single site that has high degree of Ethernet impact – where the intermittence can be demonstrated repeatedly within an hour interval.
Priority 3 (Degradation)	Intermittent connectivity of a single site that has low Ethernet impact – where the intermittence cannot be demonstrated repeatedly within an hour interval. Bandwidth throughput or other material quality of Ethernet service issues
Priority 4 (Query)	End user application performance issues across a particular Ethernet service

8.2 Resolution Target Time

The severity level of the fault will have an impact on the resolution target time in hours as defined below.

Severity Level	Hours for Fibre	Hours for Copper
Priority 1	4	5
Priority 2	12	12
Priority 3	24	24
Priority 4	48	48

Where the fault is caused by a fibre break the target repair time is 18 hours.

8.3 Target Time

Time is measured in terms of clocked hours as defined below:

- Start time – Voip Unlimited acknowledgement of the fault ticket; acknowledgement defined as a direct response from a support engineer; automated emails are not considered acknowledgement.
- Stop time – Service is restored.
- Parked time – Parked time will be deducted from the total clocked hours.

Clocked time is related strictly to the period of hours whereby Voip Unlimited are wholly responsible.

Parked time is where progression is outside of the control of Voip Unlimited and includes where:

- Voip Unlimited are waiting for an action to be completed by the Reseller or Dealer.
- Voip Unlimited are waiting for a response from the Reseller or dealer.
- Site visit is confirmed outside of the resolution window at the Reseller's or dealer's request.
- Unable to access site at an agreed time for a visit appointment.
- Incident is marked as rectified.
- If site does not have 24-hour access for a visit, then parked time commences when a visit appointment is agreed with the end user and ends when the visit appointment commences.
 - Dispatching and shipping replacement managed router.

8.4 Service Credits

Service credits will only be offered on incidents which are categorised by Voip Unlimited as Priority 1. Credits will be provided in line with the table below.

Hours past resolution target time	Service credit as a percentage of one months' rental applicable to the affected circuit
Up to 2 hours	6%
2 - 3 hours	12%
3 - 4 hours	18%
4 - 6 hours	24%
More than 6 hours	30%

8.5 What is not covered

The resolution target time and service credits stated in this document shall not be applicable in the following circumstances.

- Reseller or Dealer requests a test on the Ethernet services and no failure is detected or reported.
- The fault is due to the Reseller's own network or equipment.
- The fault is due to a managed router failure at the Reseller site.
- The Reseller is in breach of any part of the agreement that affects the Voip Unlimited ability to comply with this service level agreement.
- Failure is due to Force Majeure.

- 6.2 Any Broadband service provided by Voip Unlimited will require installation by the Reseller of the broadband equipment (required to make the service work) as the service provided by Voip Unlimited is wires only.
- 6.3 All speeds quoted reflect the Access Line speed (also known as Sync speed), which is the maximum possible speed attainable on the circuit; rather than the throughput or download speed, which may be less (see clause 6.4).
- 6.4 Download speeds are subject to variation based on, but not limited to, the following factors:
